

FOR IMMEDIATE RELEASE

Visy Strengthens Capabilities With Acquisition of Autepra

Tampere, Finland; 13 January 2025 – Visy Oy, a leading provider of process automation IT solutions including AI vision technology, has acquired Autepra UAB, a leading IT systems integrator for container terminals and ports. Autepra will operate as a subsidiary of Visy as part of VisionSense Technologies AB. The deal was finalized on 10 January 2025.

The strategic acquisition of Autepra accelerates Visy's growth in the container terminal market. Autepra brings decades of integration and project experience that will expand Visy's reach and service offerings. The existing customers of both companies will benefit from the additional products and capabilities, and new customers can expect Visy to provide a wider range of technology and services.

"Autepra has proven itself as a high-quality, customer-focused integrator in the ports industry," said **Tomi Korpelainen**, Visy and VisionSense Technologies CEO. "Adding Autepra to our team drives our growth strategy, enables us to better serve our customers, and expands our reach into new areas. The synergies are clear, and we're excited about the future."

"By joining Visy, we will strengthen our relationship with the industry leading vision technology and applications OEM bringing new opportunities to market," said **Tomas Girdzevičius**, Autepra CEO. We have been an integrator of Visy technology for many years around the world, and we welcome the opportunity to further grow our businesses together. Visy is the ideal partner for our customers and employees, and I'm thrilled about our possibilities as a combined firm."

About Visy Oy

Visy provides process automation ecosystems to manage the flow of traffic, cargo and personnel in ports, terminals, and logistics centers. Every asset that goes in or out of a facility by road, rail, or quay, is managed by Visy technology, therefore saving customers time and money on each transaction and improving operational KPIs. Visy ecosystems manage and automate more than 6,000,000 events per day in over 30 countries to enhance the quality of the supply chain.
